

Focus Flow Design System Guidelines

Overview

Focus Flow is a productivity-focused mobile application. This design system ensures visual consistency, scalability, and accessibility.

Color Usage

Primary Purple: Primary actions and highlights.

Secondary: Supporting UI elements.

Success: Positive feedback.

Warning: Caution.

Error: Validation and destructive actions.

Neutral colors: Backgrounds, borders, and text.

Typography

Font: Poppins/Inter.

H1: 32 Bold

H2: 24 Bold

H3: 20 SemiBold

Body: 16 Regular

Caption: 14 Regular

Small: 12 Regular.

Spacing

Use an 8pt grid. Common spacing: 4, 8, 12, 16, 24, 32, 40, 64.

Border Radius

4, 8, 12, 16 and 24 px depending on component.

Components

Buttons: Primary, Secondary, Ghost.

Inputs: Default, Focused, Filled, Error, Disabled.

Checkboxes, Radio Buttons, Toggle Switches, Cards with variants.

Buttons

Only one primary button should appear in each major section. Disabled buttons should have reduced opacity.

Forms

Always include labels. Display helper text when needed and show validation errors below the field.

Cards

Maintain 24px padding, consistent shadows and rounded corners.

Accessibility

Maintain sufficient color contrast and consistent spacing. Ensure touch targets are at least 44×44 px.
